

# THE SAGE CREEK TIMES

BRAGGIN' DRAGON STUDENT EDITION

January 19, 2016

## *Martin Luther King*

*by Laurissa Blakey*

*He let his voice ring*

*His actions were loving*

*He was never shoving*

*His actions still comfort bring,*

*He is our Martin Luther King*

## *Sage Creek Dragons are Fired Up to Learn*

## **When Bad Things Happen**

Hi, my name is Damien.  
Has there ever been anything  
hard in your life,  
like your dog dying? It's really  
hard, right?  
Well if there ever is  
sign here about anything that dies

## **Parent Interview with Peter Hartung by Autumn Hartung**

**Did you learn division in 4th grade?** Yes

**How many recesses did you have in 4th grade?** 3

**Did you learn multiplication in 4th grade?** Yes

**What was your teacher's name?**  
Mrs. Sims

**Who was your best friend?**  
Dave Stromfield

**What was your favorite color?**  
Blue

## **Guess What? WE'RE TINY!**

BY CHLOE SLEIGHT

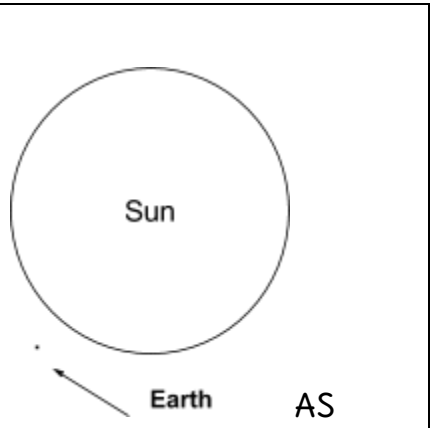

we are actually  
really TINY  
compared to the  
galaxy! recently I  
watched a video  
that compared  
Earth to the sun. I  
was awestruck to  
see how small we  
actually are.  
EXAMPLE BELOW:

Well if that happens come to  
me and I will help you, ok?  
So just come to me and I will help  
you  
i will have a name tag on me  
"Help Animals"

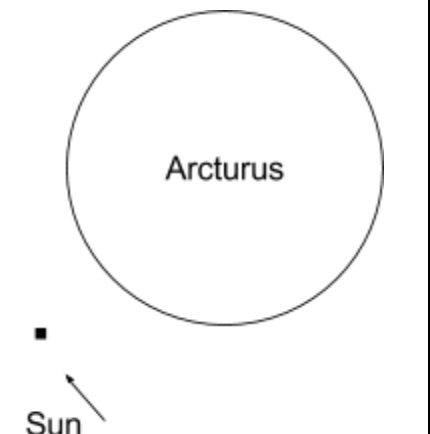

## **Ooo Ooo Ahh Ahh**

Bark Yip Growl Woof  
Meow Hiss Purr Mew  
That's what animals say.  
Humans are the smartest of  
creatures,  
and parents only say three  
words:

**Did you have any pets?** Yes, a DOG, CHARLIE and a BIRD, TIPPY  
**Where did you live?** CALIFORNIA  
**Was "Calvin & Hobbs" around then?** NO  
**Did you have a crush and if so, who?** YES, STEPHANIE  
**Did you have your own room?** YES  
**Did you have glasses?** NO  
**Where was the farthest place you went?** YOSEMITE  
**How many grandparents did you have?** 3  
**What music did you like to listen to?** DURAN DURAN

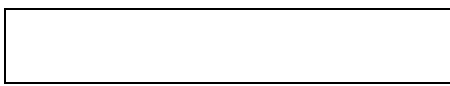

AS YOU CAN TELL OUR EARTH IS REALLY SMALL COMPARED TO THE SUN. BUT THERE ARE BIGGER STARS THE THE SUN. JUST LOOK.

ARCTURUS IS BIGGER THAN THE SUN THERE ARE SUNS BIGGER THAN ARCTURUS. NOW LOOKING AT THESE PICTURES CAN YOU IMAGINE HOW SMALL YOU ARE COMPARED THE SUN OR ARCTURUS? YOU ARE ABOUT THE SIZE OF A MICROSCOPIC GERM.

(Thank you, Mrs. Antares, for your amazing science lessons)

*I love you!*  
 by Laurissa Blakey

THIS IS THE MILKY WAY GALAXY. IN THAT TINY YELLOW BOX IS ABOUT ALL THE STARS YOU COULD SEE AT NIGHT. THAT IS A TINY AMOUNT OF STARS. SPACE IS FILLED WITH SO MANY DIFFERENT THINGS, FILLED WITH IMAGINATION, AND COLOR. THE PLANETS ARE SOME OF THE COLOR AND IMAGINATION. MERCURY, VENUS, EARTH, AND MARS ARE JUST SOME OF THE SMALLEST PLANETS OUT THERE. SCIENTISTS ARE JUST DISCOVERING NEW THINGS OUT THERE. YOU CAN BE A SCIENTIST TO JUST LOOK OUTSIDE AT NIGHT AND OBSERVE AND WATCH AS YOU LOOK AT THOSE STARS IN THE SKY!
